

ASSAY TECHNICIAN

A busy mineral processing facility requires a full time technician for our expanding analytical laboratory. This position involves the use of a variety of methods and instruments to provide the timely and accurate analyses of samples, as required by our clients. This is an excellent opportunity for a seasoned technician to gain a broader range of exposure to the analysis of different ores. It will also suit an applicant with limited or no practical experience, but with the right educational background. Preference will be given to BCIT Assayer Training students or BC Certified.

The ideal candidate should possess:

- BCIT Assayer Certificate, BC Assayer training or a science degree or technical diploma from a recognized university or college, or equivalent experience
- Strong analytical and organizational skills
- Methodical approach to work practices with emphasis on quality
- Knowledge of standard laboratory operating practices
- Ability to work in a team environment
- Excellent knowledge of Microsoft Excel

An understanding of mining, geology, and working in a laboratory environment would be an asset.

We offer a competitive salary and benefit package. Please direct resumes to:
