

Lila Afrazehdoghaheh

Lila Afrazehdoghaheh has a Master's Degree in Physical Chemistry from Tehran-Iran. During her studies at university and being a research and teaching assistant, she published a paper in the Journal of Chemical Engineering and Data, an American Chemical Society Journal based on her M.Sc. thesis. After graduation, she worked at a company as a research and development chemist.

In 2004, Lila immigrated to Canada and from 2005 to 2010, she worked in the Wet Chemistry and XRF departments of ALS Laboratory Group as a lab assistant. During that time she took several courses like Laboratory Quality Assurance and Spectrochemistry (ICP-EOS and ICP-MS) at BCIT. From June 2013, Lila worked as a lab technician at Geochemistry and Coal branches of SGS Group.

Lila started studying the BC Assayers Certification program at British Columbia Institute of Technology since 2014. Having relatively extensive experience with major analytical companies and a solid academic background, she realized that enrollment in BC Assayers Certification program would be a great opportunity to improve her knowledge and a great step forward towards being a skillful professional chemist and assayer. Lila receives the \$500 BC Certified Assayers Foundation scholarship.
