

Sally Shu Qing Li

Sally Li is an assayer in training in BCIT's Assayer Certification Program. She may be a trainee, but she has a long experience in related fields also specializing in Chemistry. Sally Li graduated from Xibei Textile Institute in Xian, China with a Bachelor's degree in Textile Chemistry. She has received full scholarships from the school during her four years study.

In September 2007, she took a job as a technician in Inspectorate Mining & Exploring Services which lasted more than 5 years, where she worked in PRA for cyanide leaching, and she transitioned to IPL where she worked in Sample Digestion and Wet Assay.

From October 2011, she started taking the BCIT Assayer's Certification Program during her tenure at Inspectorate. She took the courses to help with maintaining her routine work quality as well as rounding her existent skills and learning ones outside of her specialty. Sally is very dedicated to succeeding and completing the program. To show her efforts, she has maintained an A average through her current 4 courses in the program. She is currently on the final module.

When asked about her plans after the completion of the Assayer's Certification Program, Sally would like to find a job related to assaying so she could fully apply her skills learned from it. Sally receives the Bill Clifford Memorial \$1000 scholarship provided by the Canadian Mineral Analysts.
